+917448115877 liranramekar7@gmail.com India, Nagpur

Full Stack Developer with 3+ years of experience, adaptable to emerging technologies and skilled in problem-solving within Agile development environments.

SKILLS

Frontend

- HTML, CSS, Javascript, Typescript, React, Redux, Tanstack Query, shadcn/ui, Tailwind

Backend

- Node.js, Express, GraphQL

Testing

- Jest, Loki

Tools

- Git, Webpack, Babel, Docker

Observability

- Grafana

AI tools

- ChatGPT, Claude, Github Copilot

EDUCATION

Master in Computer Application

Manipal University (2023 - 2025)
Jaipur, India.

Full Stack Development (Diploma)

Developers Institute (2022 - 2022)
Tel Aviv, Israel.

Bachelors of Business

Administration

Rashtrasant Tukadoji Maharaj
University (2010 - 2013)
Nagpur, India.

ACHIEVEMENTS

Recognized as Key Contributor for reducing app load time by 40% and delivering highly optimized app.

LANGUAGES

English, Hindi, Marathi, Hebrew.

EXPERIENCE

SOFTWARE ENGINEER

(Jan/2026 - Present)

Pinnacle Teleservices, India

- Built reusable **RBAC permission-guard** components, hooks.
- Built reusable components (**DataTable, pagination, filters**).
- Implemented workflows with **TanStack Query and React Hook Form + Zod**.
- Built WhatsApp template preview with phone mockup rendering using React.
- Implemented **Redis-backed rate limiting, caching** with **Grafana Loki logs**.
- Implemented channel pricing configuration (markup, effective-date versioning) across frontend and backend.
- Built configurable Landing Page settings (branding, logo/favicon upload via Garage/S3) across frontend and backend.

REACT DEVELOPER

(May/2023 - Jan/2026)

Big V Telecom, India

- Built **reusable React components** for SPAs, reducing dev time by **25%**.
- Optimized state with **Redux & Context API**, cutting re-renders by **30%**.
- Optimized app by 40% through **memoization, lazy loading & hooks**.
- Authenticated & Authorized** 500+ users, **reduced API errors by 20%**.
- Worked with dynamic forms, validations, and table rendering.

FULL STACK DEVELOPER INTERN

(Mar/2023 - May/2023)

Convosense, India

- Implemented UI features, **resolved bugs**, and improved performance.
- Client-side (**jQuery**) and server-side scripts to process **API requests**.
- Improved DB performance **40%** via query **optimization & caching**.

PROJECTS

1SPOC

- It is a messaging-as-a-service platform for WhatsApp, RCS, and SMS, Email, structured as a pyramid where each tier resells to the one below with its own markup.
- It is fully role-based access and visibility is scoped to its tier.
- PERP buys base rate from upstream vendors like Meta, Jio, Airtel, Google and each tier below marks up that base rate and passes it down until it's billed to the customer. Flow from PERP to consumer unit.
- PERP (Platform), SERP (Vendor), Registry (Onboard), Org (Customer), Billing Unit (Billing), Consumer Unit (Usage).
- Tech:** React, Redux, shadcn, Tanstack Query, SSE, Node.js, Express, PostgreSQL, Prisma, Redis, Garage, rate-limit, Loki , Grafana, AWS S3, JWT, Nodemailer, Cookies.

Connect. Team up. Compete. (MERN app)

- A real-time chat platform designed to seamlessly connect, create teams, and schedule matches.
- Tech:** React, Redux, Tailwind, Socket.io, Node.js, Express, MongoDB, JWT, Cookies.
